steinberg
Steinberg Media Technologies GmbH

(Version "3.7 – 16.11.2020")

Whenever “ ” is used or the SDK has been used to create a product or the SDK is included, it is required to add the reference to Steinberg by using the “ ” as supplied by Steinberg on every of the following:

a) on package
b) on website:
The must be shown on every webpage that relates to such a product or shows . Using e.g. only within the imprint is NOT sufficient.
c) all documentation, regardless of the media used, such as PDF manuals, website, printed manuals etc. and

On every of the following the logo could be only omitted if not enough place is available, but in this case be sure to mention the Steinberg's copyrights notice:

a) all advertising materials
b) in the "about box" or an alternative place (e.g. help menu, startup screen) of the product.

It is allowed for all parties that have entered into the current Steinberg Plug-in SDK Licensing Agreement to use “ ” in regular letters to refer to compatibility as long as complying with the Agreement. This can be done on the package/website or even within the name of the product as long as the form of use is inline with the Agreement and the is always shown in the context of such. The following shall provide more guidance related to common forms of usage.

It is allowed to use claims such as “compatible with 64-bit ” if the is placed in context of such claim, e.g. not too far away on the same page, and the product uses or has been created using the SDK and is, in fact, compatible.

It is not sufficient to include the only in the imprint or one other page. All pages that relate to a product using or created using the SDK or showing must show the .

The must be printed on the package of any product using or created using the SDK or showing .

Provided that the is always displayed in the context of such product name " " might be added to the basic product name, e.g. like "mycoolEngine for " if set in regular type and not graphically illustrated or integrated into the product name and the is always shown in direct context to such product name. It is e.g. not allowed to merge the basic product name and in some graphical way into one integrated visual. E.g. it is allowed to use like this:

while it is unacceptable to use it like this:

It is not allowed to include in the company name.

It is allowed to use in channels and their names/URLs and the like if a junction is used to denote the compatibility, e.g. like in "MycoolEngineForVST", is used and the channels etc. always show the .

It is allowed to use in domains, e.g. second level domains, if a junction is used to denote the compatibility, e.g. like in "MycoolEngineForVST.com", is used and any page under such domain shows the and the domain only shows products using or created using the SDK.

It is not permitted to include in a company logo but it is allowed to include in a product logo provided that is in conformity with No. 6 (Use in product name or logo).

It is allowed to use " " in a title of the video or in video, e.g. a tutorial, in a way as named above, e.g. as addition to a product name or to show the compatibility if the is shown in the video and, if is included in the title of the video, on any page that shows the video and/or the title. Provided that a frame of the video is shown as still (e.g. when presenting the video while not playing it) and such frame includes , the frame or the direct context of the video needs to show the .

It is allowed to use in a category or in a related URL outside of the domain, e.g. as in www.myreviews.com/VSTplugins/, if such category is of generic meaning and under such categoryonly forms of use and/or products inline with the SDK agreement are listed.

It is not allowed to create combinations or compositions like " " or similar.

The current are the following:

Minimum printing size = 20 x 18,7 mm

Minimum printing size = 15 x 10 mm
